Overview / DNS settings for agenflow.com

DNS settings for agenflow.com

If you ever need to verify that you are receiving emails, please check if your DNS settings match what's listed below.

1. Log on to your hosting provider or third-party domain name system manager (usually the same place you bought your domain)

2. Locate the CNAMEs and set the following:

Name	Target
email	email.secureserver.net

3. Locate the MX and set the following:

Host	Priority	Target
@	0	smtp.secureserver.net
@	10	mailstore1.secureserver.net

4. Locate the SRV and set the following:

Port	Protocol	Name	Service
443	_tcp	@	_autodiscover

5. Locate the TXT and set the following:

Name	TXT Value
@	D3188712
@	v=spf1 include:secureserver.net -all

Note: Making these changes means you'll stop receiving email to any account previously set up on this domain.
